

Lifespan Respite Care Caregiver Needs Assessment

We are reaching out to caregivers across New Hampshire to determine the statewide need of Respite services. Please take about 10 minutes to complete this survey about your life as a caregiver, including the role respite services may play in it. All of your responses will be confidential and will not affect the receipt of services. If you need this survey to be translated into another language, this service can be provided over the phone with a third party translator. If you would like this service, please call Martha Bose at 603-271-4497 or send her an email request at Martha.Bose@dhhs.state.nh.us.

Here are some definitions and examples that may help you answer questions throughout the survey:

Respite means a time of rest or relief. Respite care provides a family caregiver a temporary, short-term break from the constant responsibilities of caring for a dependent child or adult. Examples of respite providers can include but are not limited to family members, friends, and community members (from churches, clubs, etc).

A caregiver is the primary person or persons responsible for the day-to-day care of a dependent child or adult. An example of a caregiver is an adult visiting her aging mother daily to help with meals or other daily living activities; or a parent's consistent supervision and/or medical care of a young or grown up son/daughter.
