

Goals for the Summit & Beyond

1. Have legislators, state agencies, and other stakeholders understand the need for respite care funding for caregivers.
2. Educate employers about the growing number of working caregivers, and how we can support both the employee and employer.
3. Develop alternative ways to provide respite outside of the voucher system we currently use, i.e. co-ops, volunteer training, respite sharing.
4. Discuss ways to sustain the respite voucher system.
