

Caregiver Support Services Survey

Providers are invited to complete a survey that will enable the Minnesota Department of Human Services and Minnesota Board on Aging to learn about caregiver support services in Minnesota. The purpose of the survey is to learn more about the availability and capacity of caregiver support services in Minnesota for serving informal and unpaid caregivers. Any provider that serves family, friends or community members caring for a frail, disabled, or chronically ill adult or child with special needs is considered eligible and appropriate for the survey. The short, confidential survey should be completed by the person in your organization who manages or supervises services for caregivers.

Please complete the survey by Friday, February 22 at:
